- Beat the Heat!
- Sale July 1 - 15
- Back to school!
- Where to find us

Summer is here & it's HOT!

Beat the heat...

Stay hydrated, take breaks in the shade, & be on the lookout for signs of heat exhaustion & heat stroke. Recognize the difference & know what to do! →

Tips and tricks....

- Cooling neck wraps
- Portable neck fans
- Portable bucket air conditioners
- Mister bottles with fans

Drink cool water. Large amounts of cold liquids can cause blood flow to slow making heat transport less effective on our bodies.

Back to school...

Education is so important to our future & the future of our children. We believe in giving back where it really matters. We've sponsored a local community event where we will give school supplies for several children in need. We encourage you to support your local community schools however you can.

Not only do we love schools, schools love us, too! Our hydrophobic, sanitary designed AmeriCove is ideal for schools, cafeterias, locker rooms, & bathrooms! The impermeability of AmeriCove is beneficial in areas that have a lot of water flow, making it a must have for kitchen & bathroom spaces.

Installer Tip: When installing a floor system in a bathroom, always remove the toilets prior to preparing the surface. The area should be fully cleaned/sanitized after removal. The floor should be complete prior to re-setting the toilets in place. This will prevent possible floor failure when the toilets need to be repaired or replaced in the future. It will also ensure proper sealing for sanitary purposes. Don't forget your AmeriCove to keep it sanitary at your wall seams, easy to clean, and esthetically pleasing.

Hydrate! Hydrate! Hydrate!

HEAT EXHAUSTION	OR	HEAT STROKE
Faint or dizzy		Throbbing headache, confusion
Excessive sweating		No sweating
Cool, pale, clammy skin		Body temperature above 103° Red, hot, dry skin
